Radon Measurement Technician & Certification # (if required) _____

Tester Signature _____

Test Location Data**1st Device Number** _____**2nd Device Number (if purchased)** _____Sample Collected from Kitchen Sink Outside Tap Other _____**Sample Collection Date:** _____**Sample Collection Time:** _____**TEST INSTRUCTIONS**

Remove any aeration devices or faucet filters from the tap. Run the cold water until fresh water is being drawn from the well. Water that has been sitting in a holding tank or the pipes does not contain as much Radon as fresh well water.

Slowly fill a bowl or deep pan with the spigot underwater. Minimize aeration and splashing.

Submerge the vial and the cap open side up until they fill with water.

While the vial and cap are under water, screw the cap back on tightly, lift vial out of the water and turn it upside down to check for air bubbles. If there is a bubble or an air space, repeat the process.

Fill out the data sheet with **Report To** name, address, email, test address, vial number, and the date and time the samples were collected. We cannot calculate your result without the sample collection date and time. **Note:** If any information is missing from the datasheet, or if you do not send back a datasheet with the devices, you will receive a report saying we cannot provide your test results. You may send any missing information to us at a later time by email (radon@alphaenergylabs.com) or fax (972-242-8860) and we will issue a Revised Test report.

Keep a copy of your device number and mailing address zip code. Results are available with this information by visiting our website at DrHomeAir.com/Results or by phone at (800-324-5928). You will need to enter in your device number preceded by letters: RW

Example – Device number: 123456. Use RW123456 on the website.

LAB USE ONLY

IMPORTANT TIPS FOR A SUCCESSFUL RADON IN WATER TEST

Keep this page for your records

SHIP TEST SAMPLE TO:

*11 Awl Street
Medway, MA 02053*

1. **Follow** all test kit instructions carefully and fill out the data sheet completely.
2. **Keep a record** of your device serial number and the zip code of the mailing address.
 - a. After you mail the test kit you can use these numbers to check for your radon test results at DrHomeAir.com/Results
You may use and keep this form
 - b. DEVICE NUMBER: RW_____
 - c. MAILING ADDRESS ZIP CODE: _____
3. **Water samples can freeze** in transit during the winter months. If freezing conditions are expected, activate and place a small hand warmer packet next to the sample before returning the kit to the lab. **We are not responsible for invalid results or for a free replacement kit if we receive a sample that has frozen during transit to the lab.**
4. **Send** your test kit and the completed data sheet **immediately**. We must receive the test **within 8 days (4 days if testing in Connecticut)** of when you finish the test in order to provide a valid result.
5. **Results** are usually available 1-2 weeks after we receive your kit in the lab. They will be sent to you by email if you provide it, otherwise results are sent via US Mail. You can check your results online at DrHomeAir.com/Results using your device number preceded by the characters: RW

1st Class Mail Delivery is Not Guaranteed

Most test kits sent to us via 1st Class Mail arrive at the lab within 3 to 5 days. However, if you need guaranteed delivery, we recommend that you send your kit via FedEx, UPS, or Express Mail.

If delivery of your kit is delayed more than 8 days (4 days if testing in Connecticut), we are not responsible for invalid results or a free replacement test kit.
